## Instructional Style

The Goalie Academy's personal style of coaching and method of technical training is unmatched in the goalie industry. We are the only program training from "The Principles of Goaltending," which are the basic premises of keeping pucks out of the net. The Principles include Maximizing Net Coverage, Efficiency, and Balance.

Because we coach from the stand point of these principles, we coach goaltending concepts rather than simply the puck stopping techniques. This approach allows us to coach goalies of all different "styles." We don't care how YOU keep the puck out of the net, we will help you do it in the way that best suits YOU!
